

Sridhar Mukkandi

Andhra Pradesh, India | sridharraoyalls@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Applied AI engineer specializing in retrieval systems, multi-agent orchestration, and production-grade LLM workflows across Python and FastAPI. Leading a 15-person engineering team and shipping AI proofs of concept from prototype to production for government and enterprise clients, while managing 280K+ audience reach across Instagram and YouTube.

Education

Rajeev Gandhi Memorial College of Engineering and Technology

Bachelor of Technology in Artificial Intelligence, CGPA: 8.2

Nandyal, Andhra Pradesh

Expected 2027

Experience

AI Engineer Intern

Saasta Software & Services

June 2026 -- Present

Salem, Tamil Nadu

- Lead and coordinate all 15 engineering interns across Saasta Software & Services, setting technical direction across projects and running weekly Generative AI training sessions (LLM to RAG to MCP to agentic systems) for all interns and supervisors.
- Designed and built an AI-enabled work management portal and a hiring/recruitment portal for the company as part of a distributed, 8-service backend architecture, streamlining internal operations and technical hiring workflows.
- Independently built 3 AI proofs of concept now converting to production with client sign-off: a Police FIR agent (94% accuracy, bilingual voice intake) for Coimbatore Police, a CCMC municipal services platform, and an 8-agent family AI assistant.

AI Engineer Intern (Part-Time)

SoftworkerAI

July 2026 -- Aug 2026

Dehradun, Uttarakhand

- Building softworker-platform, a Rust-based governed enterprise agent platform, implementing fine-grained OPA/OpenFGA authorization (RBAC, ABAC, ReBAC) under a formal Workpackage to Definition to Slice to Local Verification TDD process.
- Shipped an AI-triaged Gmail-to-Agent Workstream Loop end to end (Electron + React) with a custom JSON-RPC-over-WebSocket protocol client, achieving 641/641 passing tests and catching two production-impacting defects pre-release.

Freelance AI Engineer

Inspire Education

Oct 2025 -- Feb 2026

Kollam, Kerala

- Built a generative AI content pipeline for a digital platform, combining prompt engineering, multimodal AI generation, and backend integration to produce structured, high-quality generated content at scale.
- Evaluated generative AI models (Gemini, GPT-based), built a prompt library, and supported backend integration and deployment.

Projects

GraphRAG Academic Intelligence System | Neo4j, ChromaDB, LangChain, MCP | [GitHub](#)

January 2026

- Built a production-grade multi-role agentic academic assistant using a 5-round autonomous MCP orchestration loop, Neo4j GraphRAG retrieval, ChromaDB semantic search, and CrossEncoder reranking.
- Engineered Langfuse observability across LLM generations, retrieval spans, and token usage, powering async RAG pipelines with role-based access control and automated at-risk student detection.

LLM Commerce Orchestration System | MCP, OpenAI, Firestore | [GitHub](#)

December 2025

- Built an autonomous LLM commerce support agent using MCP tool orchestration, RAG-grounded retrieval, OpenAI function calling, SSE streaming, and bounded 12-turn conversational memory.
- Optimized production reliability through 512-entry embedding caches, Firestore atomic transaction safeguards, and real-time observability under concurrent multi-user load.

Technical Skills

Programming & Backend: Python, FastAPI, Firestore

AI Systems: LLMs, RAG, GraphRAG, MCP Orchestration, Agentic Systems

Retrieval & Infrastructure: Neo4j, ChromaDB, CrossEncoder Reranking, Langfuse

Frameworks & Tools: LangChain, Git, GitHub

Certifications

IBM RAG & Agentic AI Professional Certificate | Microsoft Azure AI Fundamentals

Leadership

Lead, AI Club

Rajeev Gandhi Memorial College of Engineering and Technology

May 2025 -- Present

Nandyal, Andhra Pradesh

- Mentored students on RAG systems and agentic AI workflows through a structured 3-month mentorship track.

Content Creator

Independent (Instagram & YouTube)

2020 -- Present

India

- Grew an audience across Instagram and YouTube from scratch, achieving 100K by age 18 and now 140K+ each (280K+ combined).
